

## Hands-Free Visual Assist

Experienced technicians can take still images and videos for substantiation, inspection, safety, and quality for improved compliance and confidence.

The RealWear HMT-1 is equipped with a high definition camera that can be used to capture photos and videos in hard-to-reach places like tunnels, towers, or behind large machinery and equipment. First line workers can use the HMT-1 for hands free verification and visual documentation.

## Visual Assist Industrial Use Cases

Compliance with Government and Corporate Mandates | Safety Inspections Substantiation | Quality Assurance  
Validation for Correct Procedures | Verification of Work Conducted | On-demand Training | Insurance Claims

## Documentation

### Problem

Workers put themselves in danger by carrying bulky cameras. With their hands occupied, they're unable to respond to changes in their working environment.

### Solution

Workers can easily take pictures of procedures with a few simple voice commands, even in loud environments.

## Inspection

### Problem

Visual inspections by fellow engineers do not include photographs. Often, the only evidence of a job inspection are a few notes in a log book.

### Solution

Engineers and inspectors can quickly take photos of every part of a job inspection while performing tasks.

## Training

### Problem

Workers won't always have the right expertise or experience, and may need help interpreting what they see. Delays in identifying problems can lead to escalating costs and downtime.

### Solution

Workers can easily take pictures and capture/share video for interpretation by experienced workers at headquarters. They can get help identifying problems in seconds, instead of through costly trial and error.

# HMT-1 High Definition Camera

## Capture

Capture photos and videos hands-free with simple voice commands. Say what you see (“take photo”, “photo preview”, “zoom level.”)

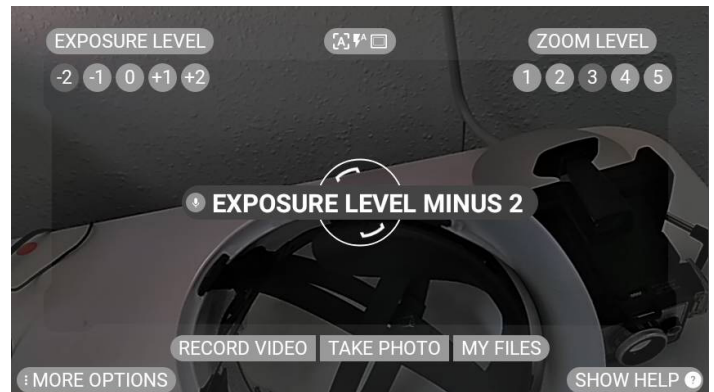

## Options

Full control of camera settings including resolution, field of view, aspect ratio and more.

## Preview

Review new and recent captured files quickly and easily.

## Exposure

Adjust camera to work in a wide range of lighting conditions.

HMT-1
